1. Team Fusion Commitment

As a company, we are thus committed to:

- Trying not to use energy, whether this means not switching on a light, or avoiding flights abroad wherever possible
- Using the lowest energy options - whether this means low energy light bulbs or, where practical, using a coach or train rather than a car, cycling to work, or vehicle sharing
- Switching to a green energy provider
- Buying locally where we can
- Trying to select supply chains and partners with the same ethos of corporate social responsibility
- Supporting others in reducing their use of fossil fuels and their production of greenhouse gases
- Minimising waste and recycling as much of it as we can.

In order to mitigate the environmental impact of the use of the raw materials, manufacturing process, storage, transportation and disposal, Team Fusion has a number of measures in place.

- Team Fusion strives to operate in an environmentally responsible manner and comply with applicable environmental laws and regulations. We strive to prevent adverse environmental impacts by reducing wastes and emissions and by promoting energy efficiency and resource conservation. Team Fusion management makes environmental responsiveness and resource conservation an integral part of business management, and support finding sound solutions to environmental concerns as they may arise.
- In all aspects of its business, Team Fusion aims to select supply chains and partners with the same ethos of corporate social responsibility. Where possible, Team Fusion endeavors to source suppliers who are accredited to ISO 14000 environmental management standards to minimize how their operations negatively affect the environment

Compliance with these policies is mandatory for all Company personnel.

Jasper de Q Adams
Chief Executive Officer
